Son Hoang Xuan

.NET / Fullstack Developer (Backend-Focused)

0974767405 hson512475@gmail.com Cau Giay - Ha Noi

PROFESSIONAL SUMMARY

Backend-focused .NET engineer with **2.5+ years of hands-on experience** building enterprise-scale APIs, real-time systems, CMS platforms, and distributed applications across **government, airline, e-commerce, and banking domains**.
Strong expertise in:

- high-performance backend APIs
- enterprise CMS migration
- system integration

Proven ability to own modules end-to-end, collaborate with international teams, and deliver scalable production-ready solutions.

CORE TECHNICAL SKILLS

Language	Professional Working Proficiency (B2)
Backend Development	C#, ASP.NET Core, .NET 6/7/8, MVC, Razor Pages, Entity Framework, LINQ, OData
Frontend (Integration-level)	HTML5, CSS3, JavaScript, React.js, Next.js, Vue.js, Razor Pages
Distributed Systems	SignalR, WebSocket, Redis Pub/Sub, RabbitMQ, Caching, Concurrency Handling
DevOps & Deployment	Docker, Docker Compose, GitHub Actions (CI/CD)
Database & Caching	SQL Server, Redis (Pub/Sub, caching strategies)
Tools & Others	Git, GitHub, Swagger, Postman, Visual Studio, VS Code
CMS & Enterprise Platforms	Sitecore XP, Sitecore Search, Sitecore OrderCloud, Directus (Headless CMS, custom extensions, migrations)
Soft Skills	Problem-solving, Teamwork, Communication, Analytical Thinking, Time Management

PROFESSIONAL EXPERIENCE

FPT Software 12/2025 - 05/2026

Project: Porter Airlines (CANADA) - Backend / Fullstack Engineer

Owned development of booking add-ons services using ASP.NET MVC for airline reservation workflows.
Design solution architecture for authentication of flow booking flight and **improved the performance** of booking system
Integrated external service providers including **Hopper and Spreedly** to support Delay Guarantee products.
Improved maintainability by refactoring legacy WebForms modules into modular service-based components.
Collaborated directly with Canadian engineering teams on cross-system integration and production releases.
Managed secure configuration workflows using **Amazon Web Services Cognito**.

FPT Software 06/2025 - 12/2025

Fullstack Developer (.NET + Vue + CMS)

Singapore Government Projects – MOE (Ministry of Education) & MPA (Maritime and Port Authority)
(Domains: Education & Logistics)
Worked on multiple government CMS projects, migrating systems from **Sitecore & Sitefinity to Directus** with high data integrity and minimal downtime.
Designed backend APIs and data models for content delivery, RBAC, and workflow management.
Built custom **Vue.js extensions** to improve content management for non-technical users.

Collaborated with cross-functional teams to validate migration, ensure performance, and support production rollout.

FPT Software 01/2024 - 12/2024

Project: ON.E (LUNA) – Enterprise E-commerce Platform

Developed and optimized backend APIs supporting promotions, coupons, campaigns, orders, product bundles, PLP, and PDP flows.
Integrated enterprise commerce ecosystems including Sitecore Search, OrderCloud, CMS, and Akeneo PIM.
Designed scalable API contracts used by React frontend teams across multiple product modules.
Contributed to performance optimization, reducing API bottlenecks in high-traffic commerce scenarios.
Participated in architecture discussions for modular service integration.

Digital Technology Solution 04/2025 - 06/2025

Fullstack Developer

Participated in onsite deployment and stabilization of a banking system for international clients.

- Configured and optimized CMS Forms, implemented custom features using C# and JavaScript.
- Acted as a technical bridge between customers and development teams, analyzing requirements and resolving production issues.
- Involved in system testing, monitoring, and bug fixing during live deployment.
- Strengthened experience in international collaboration, customer communication, and real-world system operations.

FPT Software 01/2025 - 03/2025

Backend Developer

Project: FPT Software Website

- Contributed to the development of the FPT Software website, focusing on building and optimizing user interface components while ensuring seamless content management through Sitecore CMS.
- Key Contributions:
    - Developed user interface components using HTML, CSS, Bootstrap, and JavaScript, ensuring a responsive and visually appealing website.
    - Integrated frontend components with ASP.NET Core and Sitecore CMS, enabling dynamic content management and personalization.
    - Implemented Sitecore XP features to enhance user experience and content personalization.
    - Followed Agile methodologies, collaborating with cross-functional teams to deliver high-quality UI components within project timelines.

EDUCATION

FPT University 2021 - 2025

Software engineering

- Specialized in Software Engineering.
- Completed coursework includes Data Structures and Algorithms, Web Development, Database Management.

FPT School of Business and Technology 2025 - now

Master of Software Engineering in AI (Artificial Intelligence)

- Focused on **Software Engineering with Artificial Intelligence**.
- Studying core subjects including **AI fundamentals, machine learning, software architecture, system design, and data-driven applications**.
- Applying AI techniques to enhance software development and build intelligent systems.

PROJECTS

Cafeteria Ordering & Management System 10/2024 - 03/2025

Smart Cafeteria Ordering Platform

Designed and developed an **end-to-end cafeteria ordering system** supporting QR-based table ordering.

- Implemented **real-time order tracking** for kitchen and cashier using SignalR.
- Built order grouping mechanisms to optimize kitchen workflows.

- Supported both **pre-payment and post-payment** business models.
- Implemented promotion, coupon management, and secure authentication/authorization.
- **Tech Stack:** ASP.NET Core Web API, Razor Pages, SQL Server, EF Core, SignalR
- **Integrations:** Redis, RabbitMQ, Firebase Push Notification, Payment Gateway

Sova Project (sova-omega.vercel.app) 10/2024 - 03/2025

Speech to text realtime voice

Built a **real-time speech-to-text system** for meetings and communication scenarios.

- Designed WebSocket-based architecture to handle live audio streams.
- Integrated **OpenAI API** to generate AI-powered meeting summaries.
- Supported file upload and post-processing for text summarization.
- **Tech Stack:** .NET Core Web API, Next.js, React.js, SQL Server
- **Integrations:** OpenAI API, Azure Blob Storage

CERTIFICATES

Web Design for Everybody: Basics of Web Development & Coding	Coursera
Computer Communications	Coursera
Software Development Lifecycle	Coursera

HONORS & AWARDS

First prize in the province, third prize in the national science and technology research competition for high school students: INDUSTRIAL MONITORING AND MANAGEMENT SUPPORT SYSTEM	2019 - 2020
